FORTY-FOURTH YEAR,

An Appeal to the Dealers in Sheep's Fleece to Combine

AGAINST THE MAINE MAN.

They Prefer Somebody from the West as Speaker of the House.

EASTERN MEN FAVOR FREE WOOL.

Carpet Manufacturers Take a Contrary View of the Matter.

THE REED MEN BETTING HE WILL WIN,

An appeal to wool men all over the coun try has been issued, asking them to exert their influence against Mr. Reed's selection as Speaker of the House of Representatives. The reason for this move is that Mr. Reed is a New Englander, and Eastern men are alleged to be in favor of free wool. The latest argument advanced by the Reed following in Washington is the pocketbook. They want to bet that Reed is the coming man. They also claim that no combination against him

INPECTAL TELEGRAM TO THE DISPATCH. PHILADELPHIA, November 23.-Edward A. Greene, of the firm of Edward A. Greene & Co., wool commission merchants of Philadelphia and Boston, is sending the following appeal to wool men all over the country:

Afi organized effort will be made by Nev England for free wool, and it is very important that the Speaker of the House of Representa tives shall be from the West, I suggest that you write a letter to your member (obtaining as many signatures as possible to it) requesting him to vote for whoever is the most certain to defeat the New England candidate.

THEY FEAR A DARK HORSE.

When asked his reasons to-day for send ing this circular, Mr. Greene said: "We have no personal ojections to Mr. Reed, who has declared himself in favor of tariff on wool, but, confident that he cannot be elected, fear a dark horse from Massachusetts, Rhode Island, or Connecticut might be settled on as a compromise, and these States are constituents would not persuade him to forward their views. From the answers I have received so far, it appears wool men prefer Mr. McKinley, but would be satisfied with Mr. Cannon or any other Western man for Speaker." ONE OF THEIR ARGUMENTS

A member of the firm of Justice, Bateman & Co. said: "Should wool be admitted free of duty it would be almost entirely imported, and manufacturers able to buy as cheap as we could would simply dispense with us altogether. This is why we are oped to the election of a England candidate as Speaker. Eastern manufacturers desire free wool, We favor specific duties. Class 1, or clothing wool, pays 10 cents per pound duty when the cost is 30 cents per pound or under, and 12 cents per pound when it costs over 30 cents a pound at the point of shipment. Class 3, or carpet wool, pays 234

cents per pound when it costs 12 cents or

under at point of shipment, and 5 cents per

pound when the cost is over 12 cents a

pound. A GRIEVANCE OR TWO.

"The erievance of native wool growers is that foreign growers, by crossing the Donskoi, South American, Dordova and Smyrns breeds with the Merino sheep, have brought such an improvement in the carpet grade, or class 5, which only pays from 236 to 5 cents duty per pound, that it is now used for clothing, and should pay 10 cents per pound. The remedy is to increase the duty on some of the wool imported under class three. so as to enable the home grower to compete with foreign wool of the same grade, and we desire a Speaker who will favor a measure

Out of 79 answers received by the Econo mist from wool men, 60 are for free wool and 19 only for duty ad valorem. Of these 8 are from Philadelphians and 3 of them favor free raw material, while many others, who are Republicans and have been identified with the protection crusade, are now known to secretly favor free wool.

HOPES TO SEE REED ELECTED. A large carpet manufacturer, a strong Republican, who took an active part in the last campaign, said when shown Mr. Greene's circular: "The movement is absurd, and I hope to see Mr. Reed elected. The dealers want to increase the duty on carpet wool, when it really should come in free, as it cannot be grown here to compete with the European market. If the tariff on the raw material was increased sufficiently to permit of competition, it would close every one of our mills, as the manufactured goods could be imported a great deal cheaper then we could make them here. I understand perfeetly, however, that dealers should be anxious that wool should not come in free, as it would do away with them altogether, but the industry would be better off without

#### those middle men." EVERYBODY GAINING.

IFROM A STAFF CORRESPONDENT, 1 WASHINGTON, November 23,-One week from to-day the caucus of the Republican members of the House of Representatives will meet for the election of a Speaker and officers of the House. The coming week will, therefore, be a busy one with the candidates and their friends, and all sorts of stories are affoat as to some of the phases of that business, such as combinations in the interest of this or that candi-

date, and little savory bits of history which will put this or that one at a disadvantage, Notwithstanding all these stories, it may safely be said that there will be no serious combination, because none is possible. There is no bitter personal or factional partisanship in the contest, and Congressmen tisanship in the contest, and Congressmen are not so be used by candidates to form brought for some time.

EVERYBODY TO WIN. One of the most attractive features of the intest at this juncture is that each candilate is growing in strength, according to his friends. Reed is stronger than ever, Me-Kinley's strength reaches above 100 votes, Burrows, Cannon and Henderson are each steadily growing. The aggregate of the votes claimed for each candidate is largar than the entire membership of the House.

The only definite thing that can be said is that Reed is undoubtedly in the lead, with McKinley a good second, and the others waiting for McKinley and Reed to defeat ach other, when some one of them will take

the prize.

Colonel Thomas M. Bayne and Mr. Henry Cabot Lodge made the rounds to-day, among members here, and with the final information of the week were able to say that there is not the least doubt, in their minds, of the success of Mr. Reed, and they looked as though they believed every word they said. They are the most practical,

Reed's election.

Hon. John Dalzell, also, who has been ineresting himself greatly in the contest within the last few days, says he feels absolutely assured of Reed's success.

One of the ablest and best known of the Pennsylvania Congressmen, who is in the city to-day, was approached by a champion of McKinley with an offer to bet on Mo-Kinley's election. The Pennsylvanian coolly said: "How do you want to bet?" "Oh, even, of course." "Very well; I'll bet any sum, from \$1,000 to \$5,000 that Reed will be elected Speaker." The Mc-

Reed is expected to return from New York between this and Monday. Colonel Bayne will make a flying visit to Pittsburg Monday, leaving the Capital to-m night and returning Monday night. Meantime Mr. Henry Cabot Lodge will keep an eye on affairs and checkmate any of the tricks of the opposition. LIGHTNER.

This is the first time the question has been raised.

ISPECIAL TELEGRAM TO THE DISPATCE. LYONS, N. Y., November 23 .- A case which has attracted nuusual attention in Wayne and Monroe counties was concluded in the Wayne Circuit Court, to-day. It was the case of Albert G. Graham, of Clyde, against George D. Richardson, of Rochester, executor of the estate of Edward Mahar, deceased. Mahar was sentenced to Auburn prison for life, from Monroe county, for the murder of his wife. About a year ago he died, leaving a will which devised nearly all his property, which amounted to some \$8,000, to charitable institutions in and near Rochester. When the estate came to be settled, two notes signed by Mahar were presented to the executors for payment. One note was for \$8,000 and the other for \$1,000. The executor recused to pay the notes and

the suit was the result.

The plaintiff tried to prove that the notes were genuine, and called as his principal witness J. M. DeVore, a keeper in Auburn prison. De Vore's testimony was to the effect that on May 2, 1888, Mahar and one Johnson, a fellow-convict, came to him and asked him to write two notes, one for \$8,000 and the other for \$1,000, payable to bearer and due one year from date. This De Vore did, and Mahar signed them and gave them to Johnson. This man Johnson was dis-charged soon afterward, and is now said to be dead. The notes passed from Johnson to De Vore's father, of Port Byron, then to William Graham, of the same place, and finally to A. G. Graham, of Clyde, nephew

of William Graham.

The defense endeavorad to show, and with cess, that the notes were forged. The the Monroe county pen, was very convinc-ing. Scanlan has been in prison in Auburn, Rechester and Oswego, although he is but 26 years old. His brother was killed in Rochester last spring by a railroad detec-tive, while stealing brass from a car. He Vore told him that he wanted to get some notes out of the "old man," meaning Mahar, and that he gave him two sheets of blank paper, to the bottom of each of which he was to get Mahar's signature. The papers were represented to be blank petitions for Mahar's release, which would be filled in with names afterward. The scheme worked, and Mahar signed the papers, which Scan-lan handed to De Vore, who pocketed them and remarked:

"There, that fixes him." The jury was out five hours, and then returned a verdict for the defendant, deciding that the plaintiff had no cause of action.

A busy fortnight is ahead for British politicians. Young Abraham Lincoln is still very ill, but has passed the crisis in his sickness.

IBY CABLE TO THE DISPATORAL LONDON, November 23 .- [Copyright.]-The bloodless revolution in Brazil has caused quite a sensation among the Republicans of England. Labouchere has not given tongue yet, but Sir Wilfrid Lawson waxes quite eloquent in speaking of the New World, from the frozen North to the sunny South, and from the Atlantic on the east to the Pacific on the west, being without even one king, one emperor, one hereditary grand duke or hereditary humbug of any kind.

Politicians and financiers are looking very anxiously toward Portugal. A very decided mpression prevails that the revolution in Brazil will have its effect on the Spanish peninsula, and stocks, both of Portugal and Spain, have weakened considerably the last few days. In both countries there are powerful parties ready to take any good opportunities for delivering a blow at the reigning house; and in Portugal, particularly, it is believed such an attempt would have a fair chance of success. Approved by the Politicians. TPROM A STAFF CORRESPONDENT.] WASHINGTON, November 23 .- Yet an other of the vexing offices of Philadelphia was disposed of to-day, the appointment of Shellmire as Pension Agent, following close upon the appointment of Powers and Ridgway yesterday. Shellmire is a relative of Hon. William D. Kelley, and was warmly

sed by him. Senator Quay thought it was due to Mr Kelley to respect his wishes in this matter, and, therefore, indorsed Shellmire, though Scuator Cameron desired the appointment selection that will give general satisfaction to Philadelphia Republicans.

HIS LAST LEAP IN A PARACHUTE

Sad Ending of a Great Celebration in Henor

of a King's Birthday.

A GRACEPUL FALL INTO THE WATER.

Where He Was Unable to Swim Out of Reach of the Bungry Measters.

An aeronaut named Van Tassell, well known all over the country, has met death in a horrible form. While descending in a parachute at Honolulu at a celebration on the King's birthday, he fell into the water and was devoured by sharks. A boat from a steamer, sent to his rescue, reached him in eight minutes, but no trace of him could

SPECIAL TELEGRAM TO THE DISPATCE. SAN FRANCISCO, November 23 .- Acronaut Van Tamel, who is well-known all over the United States as a daring adventurer among the clouds, met a fearful death at Honolulu, on November 16, by falling into the water from his balloon, where he was eaten by sharks. The occasion of his last accounts were the Wine's sion of his last ascension was the King's birthday. There was a grand celebration, and the festivities were to conclude with a

parachute leap. Shortly before 3 o'clock Van Tassel entered his balloon alone, after all the neces-sary preparations had been made. The conditions were favorable for his landing on land, and when the balloon shot upward it was thought be would not land more than a half mile from the starting point. The bal-loon ascended steadily to the height of 1,000 feet, when it was caught by a breeze blow-ing scaward and carried over the water.

KNEW WHERE HE MUST FALL. The aronaut evidently saw he must inevitably fall into the water, and those who were watching him with glasses saw that he was hurriedly making preparations for a descent. Suddenly the parachute was let loose, and the bag of gas shot up higher into the air. The parachute opened nicely and the man gracefully descended into the water, about two miles off shore. This was the last seem of him. the last seen of him.

the news to-day, was at the time entering the harbor. Two boats were immediately lawered, and the men were soon at the such where the man was last seen. They could find no trace of him. The parachute had sunk, owing to the weight of its iron, and three or four monster sharks were seen awimming nearby. They followed the boats back to the steamer. NO TRACE OF HIM FOUND.

Though the search was continued for several hours, no trace was found. Van Lassel was a daring swimmer, and under ordinary circumstances could not have drowned before the boats reached him. The hust for his body has been continued every day since the accident, but without avail.

The men who were in the bests say Van Tassel must have been seized by the sharing almost immediately after he struck the water, for not more than eight minutes clapsed from the time the boats were lowered until the apot was reached where the daring man to the daring man to the daring man to the struck was first diligent search was not suded ustil dark, and there is no hope whalever of re-covering the body now.

KNOWN ALL OVER THE COUNTRY. Van Tassel was well known in San Fran Van Tassel was well known in San Kran-cisco and throughout America. There are few large cities in the United States in which he has not made ascensions, and few men understand the business so well as he did, as he has been up hun-dreds of times. He made many as-censions from Woodward's Garden, Can-tral Park, and the Ocean Beach, and he successfully performed a parachute jump he successfully performed a parachute jump in this city, at the beach, a few months ago. On one occasion before the leap assury cost him his life, the parachute not opening, and descending with lightning rapidity for many hundred feet before spreading.
